

The Institute for Organismic and Molecular Evolution at the University of Mainz, Germany, invites applications for a

PhD position: Real-Time (Co-)Evolution of Plant-Herbivore Interactions

in the group *Plant Evolutionary Ecology*, headed by Prof Dr Meret Huber
(<https://plant-evolutionary-ecology.uni-mainz.de>).

Salary level TV-L E13, 50%

Background: One of the central paradigms in plant-herbivore interactions states that plants and their herbivores co-evolve. Yet, experimental evidence for this prediction is scarce. In this project, we aim to fill this knowledge gap by experimentally evolving duckweeds and one of its major native herbivores, the waterlily aphid. By taking advantage of the rapid life cycles and the genetic and experimental manipulation possibilities in these species, we will observe and manipulate evolution in both interaction partners in real-time and thereby experimentally test a central hypothesis in plant-herbivore interactions and chemical ecology.

We look for an enthusiastic and ambitious PhD student with strong interest in plant-herbivore interactions and evolution. The applicant should have a solid background in ecology and evolution, and have interest in combining genetic engineering, chemical analytics, and experimental evolution. Experience in the field of plant-environment interactions is advantageous. The applicant must be fluent in English and hold a MSc degree in Biology or related fields.

We offer a stimulating and interdisciplinary research environment including state-of-the-art facilities in a dynamic and international research group that ensures extensive supervision. The candidate can join the graduate school GenEvo (“Gene Regulation in Evolution”) and fully benefit from its tailored programme.

How to apply: Please send a single pdf including i) a motivation letter (max. 2 pages), ii) detailed CV, iii) copies of BSc and MSc degree, and iv) names and addresses of two referees to meret.huber@uni-mainz.de until 31.03.2024. The successful candidate may start as soon as possible.

The University of Mainz is an equal opportunity employer and is committed to increasing the proportion of female academics. Consequently, we actively encourage applications by women. The University of Mainz is committed to employing more staff with disabilities. Candidates with recognized severe disabilities who have equivalent qualifications are given preference in hiring decisions, although some restrictions related to specific project-related tasks may apply.
